

Co-funded by the European Union's Horizon 2020 Research and innovation Program

15 mobility fellowships for experienced researchers co-funded by AIRC and the European Union

Interested in joining an international training research program on cancer? Have in mind a cancer-related research project? If so, the iCARE-2 post-doctoral fellowship program may be what you are looking for! The first international iCARE-2 call is now open until June 25 2018. A second call will be launched in 2019. Don't miss this opportunity!

What is iCARE-2?

iCARE-2 is an international fellowship program co-funded by the Italian Association for Cancer Research (AIRC) and the European Union's Horizon 2020 research and innovation program under the Marie Skłodowska-Curie Grant Agreement No 800924, intended to promote the mobility of experienced researchers to and from Italy.

iCARE-2 offers these types of 3-year fellowships:

- Outgoing Fellowships, for researchers who have worked in Italy for more than three years, interested in a research experience in a scientific institution located in a different country than Italy.
- Incoming Fellowships, for non-Italian scientists interested in a research experience in a scientific institution in Italy.
- Reintegration Fellowships, for Italian researchers who have worked in a country outside Italy for at least two out of the last three years, and who wish to return and work in a research center in Italy.

To be eligible, applicants must have *either* a doctoral degree, *or* at least four years of research experience after their undergraduate/master's degree. The research plan must have a clear **focus on cancer**. Winners will be selected through a transparent and independent peer review process.

Benefits

Hosting institutions must agree to take on the fellow under a **full employment contract**, with adequate and equitable social security provisions, and must offer training activities in complementary skills. The package includes a travel allowance, a research/dissemination cost contribution to cover publication costs, and a training cost contribution to attend scientific meetings and transferable skills training events.

How to apply

Full details of the application process, including eligibility criteria, are available at: www.icare-2.airc.it

The deadline for submission is June 25, 2018
