### Short bio:

Ilaria Di Carlo, born in Como (Italy) on 25/05/1994. Graduated from the “ Marco Vitruvio Pollione” Scientific High School in Avezzano. Bachelor degree in Biotechnology (110/110 cum laude) from University of L’Aquila. Master degree in Medical Biotechnology (110/110 cum laude) from University of L’Aquila. Currently holding a Research Fellowship on AIRC project at Bone Biopathology Lab of Professor A. Teti (University of L’Aquila). Italian mother language with knowledge of English and Spanish languages.

### What do you expect from this training?

From this training I expect to enrich my scientific knowledge about physiology and pathology of bone and calcium metabolism and methods in bone research. I also expect to be able to improve my skills by benefiting from the experience of mentors, listening to PhD students' projects and interacting with other participants

### Bonus question: What motivates you to get out of bed in the morning?

The desire to know new things and my great passion for Scientific Research. My desire is to be able to improve people's lives, through my studies and my lab work
