Short bio:

High School with a specialization in Science
Istituto Magistrale B. Spaventa Città
Sant'Angelo (Pescara), with vote of 89/100

Bachelor's degree in Biotechnology
Scienze cliniche applicate e biotecnologiche –
duration: 3 years
Università degli studi dell'Aquila, with vote of
110/110 cum laude

Master's degree in Medical Biotechnology
Scienze cliniche applicate e biotecnologiche –
duration: 2 years
Università degli studi dell'Aquila, with vote of
110/110 cum laude and applause from the
graduation authorities.

I am currently a fellow at the "Bone
Biophatology Laboratory" at the University of
L'Aquila, where I work on a Telethon project
about "Autosomal Dominant Osteopetrosis
Type 2 (ADO2)".

What do you expect from this training?

Through this experience I hope to increase my knowledge and skills in the scientific fields, sharing the information of my colleagues and experts in the various scientific fields.

Bonus question: What motivates you to get out of bed in the morning?

I get up every morning with the awareness of the importance of the work that I do every day and for the passion that I have for the science, with the hope of helping others.
