

Name: SERGHERAERT Johan
City: Reims (France)
Date of birth: May 28th, 1992
Email:
johan.sergheraert@univ-reims.fr

Studies: Odontology, Biology

Specialization: Oral Medicine,
Periodontology, Biology

Short bio:

I am a French dental surgeon (DDS) in my first year of university thesis.

I started my dental studies in 2010 in Nice University (France). From 2015 to 2019, I realized a postgraduate in Oral Medicine in Reims hospital.

In the same time, I started scientific research in BIOS laboratory (Reims, France) where I performed a Master's degree in Biology and Health in Reims University.

Since 2019, I am an university and hospital assistant in Periodontology in Reims hospital. I am also a PhD student under the director of Doctor Frederic Velard in BIOS lab.

My project treats about Cystic Fibrosis and the interactions between osteoblasts and osteoclasts.

I am interested in bone biology in rare disease, osteoimmunology and periodontology,

I am considering applying for an associate professor in Periodontology after my PhD.

What do you expect from this training?

This training gives me the opportunity to meet European students and researchers. Also, it will be my first international presentation of my thesis project.

Also, I expect to update my knowledge about bone biology.

Thanks to this MasterClass, I would like to make contact within ECTS community.

Bonus question: What motivates you to get out of bed in the morning?

The desire to advance my professional and personal projects, to improve my knowledge and to learn new skills.
