

Name: Sebastian Zanner
City: Odense, Denmark
Email: SZanner@health.sdu.dk
Twitter handle: @Snapastian
Studies: Molecular Biology

Specialization: Diabetes and Bone

Short bio:

- 2020: PhD student at the department of endocrine Research at the University of Southern Denmark
- 2019: Internship in Sydney, Australia with a focus in imaging T-Cell receptors
- 2018: Master in Freiburg, Germany: Studying integrins with an optogenetic approach
- 2015: Bachelor in Bayreuth, Germany: Investigating endemic orchid species and their carbon uptake through photosynthesis
- 2011: Abitur in Karlsruhe, Germany

What do you expect from this training?

I expect to connect with people all over the world. Additionally, I expect to get a deep insight of other research approaches and feedback for my own studies. Also, I expect to gain basic knowledge in bone research from different perspectives.

Bonus question: What motivates you to get out of bed in the morning?

The fact that my work can improve peoples health and a motivating environment at KMEB.
