

Name: Viktorija Avilkina
City: Boulogne sur Mer, France
Date of birth: 23 November 1996
Email: viktorija.avilkina@univ-littoral.fr
Twitter handle: n/o
Studies: Masters of Science by Research

Specialization: Molecular Biology

Short bio:

I am Russian, born and raised up in Latvia. In order to obtain better education, I moved to different places and during past 8 years I lived in 6 countries.

I obtained Baccalaureate degree in Biomedical Genetics at Newcastle University, England. Throughout my degree, I participated in organisation of fundraising events, as well as gaining research experience, during my summer lab-based project. Additionally, I went for Erasmus exchange to Barcelona, Spain, where I conducted the Final Year Project. After I continued my studies and graduated with Masters degree from University of Edinburgh, Scotland. During this time, I worked in different research institutions and one of them was well known Roslin Institute

What do you expect from this training?

As I am a first year PhD student and due to the current situation in the world, I was not able to attend conferences and talk to the other scientists involved in bone research. Therefore, I mainly expect to communicate with senior researchers from around Europe, in order to understand the future perspectives in this research segment. And additionally learn new information during the

Bonus question: What motivates you to get out of bed in the morning?

The hope that every new day will bring new experiences and knowledge, in order to grow and develop yourself. As well as, new emotions to put in the 'memory bank'.
