

# Michaela Tencerova

Institute of Physiology of Czech Academy of Sciences, Prague, Czech Republic

## Statement of Nominee

I have been a member of ECTS since 2022, when I was also selected as a member of the ECTS Academy. Since then, I have been participating in several Academy activities, including mentoring sessions, intra-academy collaboration, organizing Open Forum and Academy retreat. I am a member of ECTS Basic Science Committee and ECTS Central Europe Action Group. I also serve as a member of Scientific Board of the Bone Marrow Adiposity Society (BMAS), and the American Society for Bone and Mineral Research (ASBMR) Women in Science Committee, which give me an opportunity to connect with the experts in the field from all over the world and serve to the societies in musculoskeletal research. I have participated in organizing several national and international meetings.

I feel honored and very enthusiastic to be a part of the ECTS and participate in activities promoting a great science among all members, especially early career scientists, help in establishment of new collaborations and dissemination of our work to general population in order to increase the importance of our work for the possible implementation in clinical use.

It would be a great honor to join the ECTS Board and contribute to the ECTS activities and represent the needs of early career scientists in the Society. I would like to promote the work of the ECTS Academy members by having a scientific session at the ECTS meeting devoting to our research to make the Academy members visible and inspirational for new generation of future leaders in musculoskeletal field.
